### **Strokes of Genius is about "ability"!**

Not every person with autism is a Genius!  
Not every person with autism is a SAVANT!  
While 50% of savants have autism, only approximately  
10% of individuals with autism are savants.

### **Train The Talent (TTT<sup>SM</sup>) Art Studio Workshops:**

Strokes of Genius offers Art Studio workshops for individuals with Autism Spectrum Disorders (ASD) who have an interest or talent in art. Workshops include drawing, watercolor, acrylic paints and clay. TTT<sup>SM</sup> workshops help the individual build confidence, develop appropriate leisure skills, promote self-awareness and increase overall communication while building social and emotional skills through art.

Classes can be individually tailored to address specific needs. Our instructors are a diverse team of talented and highly trained teaching artists, certified art therapists and college instructors certified in TTT<sup>SM</sup> methodologies. Whether an individual student has a "gift" or "talent" for art; or just a basic interest in doodling, TTT<sup>SM</sup> will help to develop the particular skill level.

The TTT<sup>SM</sup> Art Studio of Brooklyn will be open this June 2013. Various locations offering TTT<sup>SM</sup> will be added within the 5 boroughs of NYC soon, eventually expanding nation wide.

***Registration opens May 1st
